

Recipe Replacement

The Recipe Replacement program allows you to replace one or more items in multiple batching or packaging recipes at the same time by creating a recipe replacement record. This avoids you having to identify, clone, edit and then publish each recipe separately.

Access the program through the Main Menu bar, *Master Tables >> Recipe Manager >> Recipe Replacement*

To create a new record, select New

Recipe Replacement	
File Comment Protot	yp
: 🗋 📬 👫 🙆 📕 🖬	
General Replacement Ingree New (Ctrl+N) Closed:	die

Enter the reason for the record in the description box

Mar-Kov Computer Systems Inc.

This document and its content are proprietary to Mar-Kov Computer Systems Inc. and shall not be reproduced or disclosed to any third party without prior written consent.

Select the Replacement Ingredient Tab.

Identify the ingredient you will be replacing in the From Ingredient field and enter the new ingredient in the To Ingredient field.

The new recipes will be created with the ingredient replacement complete. The recipes can be examined using the Batching and Packaging Recipe programs.

To publish the new recipes with the ingredient replacement, set the selected flag and select Publish Recipe

E 6		
	Publish Re	cipe
Error	Old Recipe	Context

Note: If workflows are defined for Publish Recipe, then they must be completed before you publish the recipe.

Once the all the changes required have been made, close the Recipe Replacement record by selecting the Close Record or checking the Closed flag on the *General* tab and saving the form. Once the recipe record is closed no further actions may be performed on it.

Important: There can only be one open Recipe Replacement record at a time.
